# A LETHAL DOSE OF FENTANYL

# DON'T BE FAKED OUT

Teens in Arizona are losing their lives at alarming rates. What's killing them? Fentanyl & fake prescription pills laced with Fentanyl.

**NEVER TAKE A PILL THAT IS NOT PRESCRIBED TO YOU BY A DOCTOR**

## Never Assume A Pill Is Real

Deadly doses of fentanyl are added to these fake pills to increase their potency. One pill can literally kill you!

**DEA lab testing reveals that 2 out of every 5 pills with fentanyl contain a potentially lethal dose.**

## WHAT IS FENTANYL?

LEFT  
Real Xanax

TOP  
Real Oxycodone

RIGHT  
Fake

BOTTOM  
Fake

- Fentanyl is a powerful opioid medication that medical professionals use to treat patients who have severe pain.
- When it is prescribed by a doctor & dispensed by a pharmacy. Fentanyl is considered **Real/Legitimate**.
- **Fake** Fentanyl is manufactured illegally & sold by drug dealers as a powder, or added to fake pills that look like real prescription medications.

## FAKE PRESCRIPTION PILLS VS REAL PRESCRIPTION PILLS

- Fake pills are fake medications that have different ingredients than the real prescription medications, such as oxycodone (Oxycontin®), hydrocodone (Vicodin®) and Xanax®.
- Fake pills are extremely dangerous because they often look identical to real prescription pills.
- Fake pills are purchased online or from other people.
- Real prescription drugs are prescribed by licensed medical professionals for a medical condition.
- Real pills are purchased at a licensed pharmacy.
